1.) Overview

This document is provided as a user guide for the KeePass product offering on the AWS Marketplace. Please reach out to support@cloudimg.co.uk if any issues are encountered following this user guide for the chosen product offering.

2.) Access & Security

Please update the security group of the target instance to allow the below ports and protocols for access and connectivity.

Protocol	Type	Port	Description
----------	------	------	-------------

Registered

support@cloudimg.co.uk
<https://cloudimg.co.uk>

RDP	TCP	3389	Remote Desktop Access
-----	-----	------	-----------------------

3.) System Requirements

The minimum system requirements for the chosen product offering can be found below

Minimum CPU	Minimum RAM	Required Disk Space
1	1 GB	30GB

4.) Connecting to the Instance

Once launched in the Amazon EC2 Service, please connect to the instance via an RDP client using the **Administrator** user. Please allow the EC2 Instance to pass 2/2 status checks before connecting via RDP to allow the system enough time to complete the boot process.

To obtain the randomly generate password on boot for the Administrator user, please follow the below steps in the AWS Console.

Log into the Target AWS Account > Select the region of which was chosen to host the newly launched cloudimg AMI

The screenshot shows the AWS Management Console Home page. The top navigation bar includes the AWS logo, a search bar, and the current region (N. Virginia) and account (cloudimg). The main content area is divided into several sections:

- Recently visited:** A list of services recently accessed, including EC2, S3, AWS Cost Explorer, AWS Marketplace Subscriptions, Systems Manager, Elastic Kubernetes Service, AWS Budgets, VPC, CloudShell, AWS Application Migration Service, Service Catalog, CloudTrail, IAM, and EC2 Image Builder.
- Welcome to AWS:** A section with links for getting started, training and certification, and discovering new services.
- AWS Health:** A section showing 0 open issues and 0 scheduled changes.
- Cost and usage:** A section showing current month costs of \$55.04, forecasted month end costs of \$103.38, and top costs for the current month (EC2 - Other: \$40.90, Tax: \$9.17, Amazon Simple Storage Service: \$3.20).

Resources

You are using the following Amazon EC2 resources in the US East (N. Virginia) Region:

Instances (running)	1	Dedicated Hosts	0	Elastic IPs	0
Instances	1	Key pairs	12	Load balancers	0
Placement groups	0	Security groups	2	Snapshots	863
Volumes	1				

Launch instance

To get started, launch an Amazon EC2 instance, which is a virtual server in the cloud.

[Launch instance](#) [Migrate a server](#)

Note: Your instances will launch in the US East (N. Virginia) Region.

Service health

Region: US East (N. Virginia)

Status: ✔ This service is operating normally

Zones

Zone name	Zone ID
us-east-1a	use1-az6

Account attributes

(+44) 02045382725
3rd Floor 86-90 Paul Street London EC2A 4NE
support@cloudimg.co.uk
<https://cloudimg.co.uk>

Click Browse and upload the key pair selected during the launch of the EC2 instance from the AWS Marketplace.
Click Decrypt password

The Administrator password will now appear in plain text like the above example. Take a copy of this value and open a Remote Desktop Client Application.

support@cloudimg.co.uk
https://cloudimg.co.uk

Create a new connection and enter the IP address of the newly launched EC2 Instance. For this example, the public IP address will be used as the server has been launched in a public subnet. Use the private IP address where applicable for your environment if you have a private connection into the AWS VPC of which hosts the EC2 Instance. These Private connections often take the form of a VPN connection.

Click Add

Once added, double click the connection profile created in the above step, you will be prompted for a username & password. Enter the below values.

Username: Administrator

Password: DECRYPTED VALUE RETRIEVED FROM THE ABOVE STEPS

Click Continue
